

FAQ# 25-08220103
Modified 08/22/01

Why do I only get 16,363 rows when I export to Excel?

Issue

The Crystal Reports Excel export DLL (ie. U2fxls.dll) has a MAXIMUM record limit, which is to export to MAXIMUM of 16,384 rows.

NOTE: This is the row limitation of Microsoft Excel 4.0, 5.0, and 7.0 (and not of Crystal Reports).

Solution

The row limitation in Microsoft Excel 8.0 is now 64,000. Only the Crystal Reports version 7 export DLL for Microsoft Excel can export up to this maximum limit.
